100-57SA High Level Automatic Case Palletizer

Features

- High infeed
- Interlocking and column stack patterns
- Overhung or underhung loads

Description

The 100-57SA is a fully automatic, medium speed palletizer. It handles trays and cases at speeds up to 25 cases per minute. The 100-57SA is flexible, handling a wide range of case patterns.

Operation

First, cases enter the metering belt. They are then conveyed and turned, forming rows for desired pallet patterns. Next, full layers are transferred to positioned pallet with stripper plates. The sequence is repeated forming a full load. The product is then discharged to a power accumulation conveyor.

Options

- Pallet Dispenser
- Slip Sheet Dispenser
- Tie Sheet Dispenser
- Glue System
- Roller, Gravity and Drag Chain Conveyors

Typical Machine Configuration
