Pallet Dispenser/Stacker Model 50-57J

Phone: 724-658-4516 ▪ Fax: 724-658-5100 ▪ E-Mail: ncco@newcastleco.com

Features

- Used as dispenser or stacker
- Fully automatic
- Floor level loading and unloading is done with pallet jack

Description

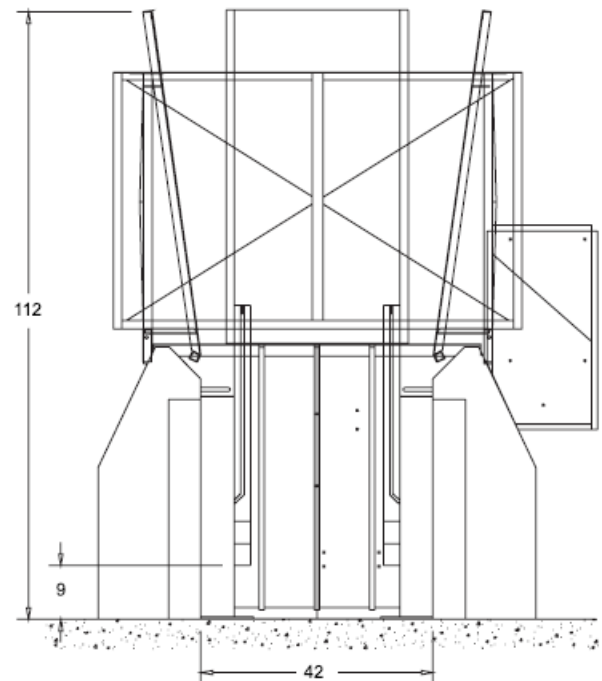

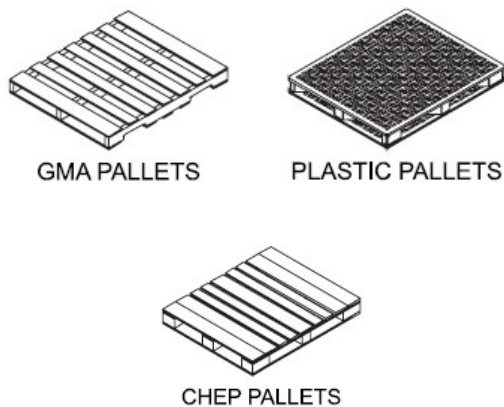

The Newcastle 50-57J is a fully automated, floor-level pallet dispenser and stacker. This unit can handle various pallet sizes and styles and eliminates the physical handling of pallets.

Operation

A single pallet is automatically removed from the bottom of the stack and positioned on the floor. Using a pallet jack, the pallet is then unloaded from the machine. The operation can be reversed, stacking the pallets in a magazine. The entire stack can then be unloaded with a pallet jack.

Automatic Pallet Dispenser Model 50-57J
