Automatic Pallet Stacker Model 50-57

Phone: 724-658-4516 ▪ Fax: 724-658-5100 ▪ E-Mail: ncco@newcastleco.com

Features

- Stacks GMA, Chep, winged plastic pallets, skids, and collapsible containers
- Automatic operation
- Two pallets per-minute cycle rate
- Magazine capacities up to 40 pallets

Description

The 50-57 receives single pallets from customer infeed conveyor and automatically lifts and stores in a magazine.

Operation

Single pallets are received with conveyor installed inside stacker. A hydraulic lift and parallel holding bars are utilized to fill storage magazine. Full stack is unloaded with a fork truck. Models are available that can discard a full stack to a conveyor.
