Barrel Type Inverter Model DL-3500

Phone: 724-658-4516 ■ Fax: 724-658-5100 ■ E-Mail: ncco@newcastleco.com

Features

- In-line configuration
- Powered roller conveyor
- 180 degree rotation
- Hydraulic/mechanical operation

Description

The product requiring 180 degree inverting is received by the inverter conveyor and positioned in the unit. The clamp assembly secures the load and the product is inverted. The conveyor then discharges the load onto the customer's conveyor. The material is handled safely, while also eliminating damage.

The clamp pressure can be adjusted, depending on the type of materials being handled. Sensors in the inverter align the product.

DL-3500 Barrel Type Inverter
