Captive Pallet Board to Pallet Load Transfer System Model RM-1150B

Phone: 724-658-4516 ■ Fax: 724-658-5100 ■ E-Mail: ncco@newcastleco.com

Features

- Fork truck loading or conveyor infeed discharge
- Automatic board stacking, pallet dispensing
- 4,000 pound capacity

Description

The RM-1150B captive board to pallet load transfer system automatically transfers cased product from a plywood board to a shipping pallet.

Operation

Cased product on plywood pallet boards is received from customer's conveyor and positioned in front of the push plate. The pallet dispenser then cycles, placing a pallet under the stripper plate. Next, a push plate extends, transferring the product to a stripper plate. Then the plate retracts, placing the load on a pallet. Finally, the board is lifted and stacked automatically.
