## Pallet to Pallet Load Transfer System Model RM-1150Z

Phone: 724-658-4516 ■ Fax: 724-658-5100 ■ E-Mail: [ncco@newcastleco.com](mailto:ncco@newcastleco.com)

### Features

- In-line machine configuration
- Handles many load configurations
- Conveyor infeed and discharge

RM-1150 Pallet to Pallet Load Transfer System "Z" Configuration

### Description

The RM-1150 pallet to pallet load transfer system automatically transfers cased product from one type of pallet to another for shipping, storage or to meet other in-house production requirements.

### Operation

Palletized product is received from the infeed conveyor and positioned for transfer on an empty pallet located under the stripper plate. The push plate then transfers the product to the stripper plate. Next, the stripper plate retracts, placing the product onto an alternate pallet. Finally, the empty pallet is automatically stacked.
