Double Load Stacker Model RM-1250

Phone: 724-658-4516 ■ Fax: 724-658-5100 ■ E-Mail: ncco@newcastleco.com

Features

- Eliminates the need for fork truck and operator
- Double stacking saves warehouse space
- Double stacking makes product transportation more efficient
- Automatic in-line operation

Description

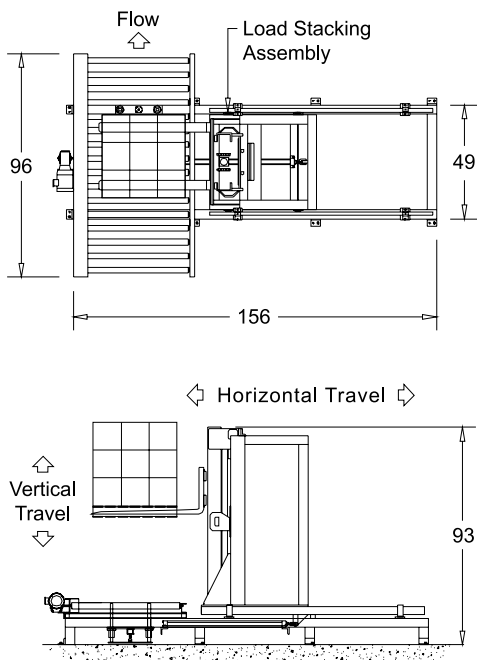

The Newcastle Load Stacking System is designed to automatically double stack full loads on pallets.

Operation

Palletized product is received and positioned for stacking with a power roller conveyor. Forks extend into pallet and lift load for stacking. With a second pallet in position under the first, the suspended load is then lowered and double stacked. The stacked product is discharged onto the customer's conveyor.
