Load Clamp System Model RM-1350S

Phone: 724-658-4516 ▪ Fax: 724-658-5100 ▪ E-Mail: ncco@newcastleco.com

Features

- Clamps and lifts product
- Load squaring on two (2) or four (4) sides
- Automatic pallet stacking and dispensing

Description

The RM-1350S is utilized to automatically transfer product from pallet to pallet and provide load squaring.

Operation

Palletized product is loaded into system with a fork truck. Clamp assembly extends and secures product. Load is lifted from pallet. "Go From" pallet is discharged and automatically stacked. "Go To" pallet is dispensed and positioned under suspended product load is lowered and positioned on pallet. Clamps open and product is rotated 90 degrees. Clamp assembly squares cases. Turntable rotates back to home for fork truck unloading.
