Collapsible Container Stacker/Destacker Model RM-1360

Phone: 724-658-4516 ■ Fax: 724-658-5100 ■ E-Mail: ncco@newcastleco.com

Features

- In-line operation
- Stack or destack
- Handles open and closed containers

Description

The RM-1360 is used to stack and destack open or closed containers, handling up to four (4) containers per minute.

Operation

A stack of containers is received from the customer's conveyor and positioned in the RM-1360. Hydraulic lifting arms then close and lift the containers off of the bottom container. Next, a single unit is discharged and partial stack is placed on the conveyor. The sequence is repeated, destacking all the containers. The process can be reversed, automatically stacking the containers.
