Pallet to Conveyor Load Transfer System Model RM-1850

Phone: 724-658-4516 ■ Fax: 724-658-5100 ■ E-Mail: ncco@newcastleco.com

Features

- 4000 lb. capacity
- Captive pallet stacking
- Multiple configurations

Description

The RM-1850 is an automatic system for transferring palletized product from captive plywood pallets to a conveyor. The palletized product is then lifted from a captive pallet, allowing the captive pallet to be discharged to a board stacker. The board is automatically lifted from the conveyor and stored in a magazine. The full pallet is finally conveyed to a pick up position for removal by fork truck.

Palletized product received on captive plywood pallet

Palletized product is lifted from captive pallet and conveyed into a pallet stacker
