### 7 Strand Belt Transfer

The 7 strand transfer is moving steel, in the flat, off of a line shaft conveyor to be moved to the next stage of the manufacturing process. These strands have a 2" wide Nitrile rough top belt to avoid scratching the metal while being transferred and have UHMW post which serve as a product stop. These 7 strands are spaced at varying distances to accommodate multiple lengths of metal up to 32 ft. weighing as much as 150 lbs.
