Slat Conveyor w/ Protective Roller Guard

This heavy duty slat conveyor, model 608SL, conveys heavy product until coming in contact with stationary, fixed roller stop. Rollers mounted in stop are covered with PVC covering to protect product conveyed.

Pneumatic Stop for Light Duty Gravity

This is a pneumatic roller stop designed for Roach light duty gravity conveyor, model 138G / 138A.

Special Pneumatic Stop for Line Shaft

This is a specially designed stop for mounting in Roach 196LS line shaft driven conveyor. A pneumatic cylinder moves the roller stop assembly upward UHMW channel when activated.

Indexing Pin Stop

Modified pneumatic stops are used together to index product. In this instance, a barrel container is indexed with two modified package stops, model PRSG. When offloading, stop nearest discharge end of conveyor is lowered while stop nearest infeed of conveyor is raised. Product is released by stop in lowered position while product is held by stop in raised position.

CDLR w/ Parts Escapement

This parts escapement conveyor features two overhead stops, and a parts pusher to transfer from conveyor to conveyor. All stops were pneumatically controlled and with the controls mounted to the conveyor and easily accessible.
