# SMARTFLEX<sup>®</sup>

High-Performance, Flexible, Modular  
Chain Conveyors

# DORNER<sup>®</sup>

Authorized Distributor

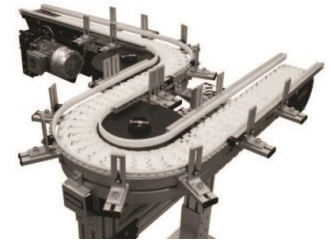

### Online Configurator

Engineer simple or complex conveyors to meet your needs in minutes. The industry leading tool delivers a complete 3D CAD assembly model for instant validation of fit.

### SmartFlex<sup>®</sup> Conveyors are best for:

- Part Handling
- Transfers
- Tight Spaces
- Elevation Changes
- Accumulation
- Buffering
- Complex Configurations
- Long Lengths
- Curves, Jogs, Incline & Decline

### Common Drives:

- Multiple conveyors can be coupled together and driven from a single gearmotor
- Conveyors move at same relative belt speed
- Creates single lanes for handling parts
- Wide parts or pallets can be carried by each conveyor to allow for access from below
- Can be used on systems with curves

### SmartFlex Pallet Systems are best for:

- Small to Medium Size Product Assembly
- Manual and Automated Assembly
- Product Testing and Inspection

### Assembly Automation in:

- Automotive
- Electronics
- Medical
- Life Science Products
- Health and Beauty Products
- Appliance Products
