

## Plastic Modular & Table Top Chain Conveyors Photo Gallery

### Stainless Steel Frame w/ Plastic Belt

This Stainless Steel Plastic Belt Conveyor was built to conveyor frozen foods without damaging the packaging and product. The UHMW guides keep the product in route without rubbing the product labels off the container.

### Tire Centering Device

The tire centering device will align tires in the center of the conveyor to be unloaded by robot. As tires move into the centering area the paddles clamp onto the tire placing it in the center. The 52" wide series 400 roller top belt allows the conveyor to operate continuously while the tire is clamped in place. Roller top belt has also been attached to the face of the paddles to aid in alignment.

### Plastic Belt Conveyor

### Plastic Belt Conveyor w/ Rollers

Plastic belt with integrated rollers at a perpendicular angle to the conveying direction. Facilitates easy transferring of product onto and off of the conveyor.

### Table Top Metal Chain Conveyor

Tabletop Chain Conveyors are designed to move bottles, cans, packages, and other products along a processing line with maximum efficiency and minimum pressure. This includes a high carbon steel chain which offers excellent corrosion and abrasion resistance and strength.

### Table Top Chain Incline Conveyor

Tabletop Chain Conveyors are designed to move bottles, cans, and packages along a processing line with maximum efficiency and minimum pressure. Ideally suited for beverage, personal care, household products, and paper products industries, tabletop chains are versatile in their applications.

### Table Top Chain Conveyor

Tabletop Chain Conveyors are designed to move bottles, cans, and packages along a processing line with maximum efficiency and minimum pressure. Ideally suited for beverage, personal care, household products, and paper products industries, tabletop chains are versatile in their applications.

### Table Top Chain S-Curve Conveyor

Tabletop Chain Conveyors are designed to move bottles, cans, and packages along a processing line with maximum efficiency and minimum pressure. Ideally suited for beverage, personal care, household products, and paper products industries, tabletop chains are versatile in their applications.

### Table Top Chain Curve Conveyor

Tabletop Chain Conveyors are designed to move bottles, cans, and packages along a processing line with maximum efficiency and minimum pressure. Ideally suited for beverage, personal care, household products, and paper products industries, tabletop chains are versatile in their applications.
