Span Tech – Your Material Handling Specialist

ST-Series

*Conveyors that do more than transport ...
they **DELIVER.***

The remarkable flexibility of the Span Tech conveyor line allows you to specify a modular solution for your material handling needs.

With our unique design, the chain is completely captured to the conveyor. There are no dangerous catenaries or take-ups, which means:

- *Less chance of injuries*
- *No tracking problems*
- *A very quiet system*
- *Ability to run at high speeds even with horizontal and vertical bends*

Span Tech conveyors are plastic chain based, and are available with stainless steel or powder coated painted steel construction. Our conveyors have been designed and built with simplicity in mind, for simple maintenance and repairs.

The numerous options available will result in a conveyor or conveyor system that's ideal for your application.

Each is built and backed by Span Tech, a company that has earned its reputation as one of the finest in the material handling industry.

ST-Series

*Engineered for dependable, nearly maintenance-free operation.
Options to fit almost any application.*

The Span Tech ST-Series conveyors are straight conveyors. They are ideal for transporting packaged items, assembly work, or applications where belt conveyors have traditionally been used. The ST-Series comes with a fully assembled bed section and separate legs for quick assembly.

Features & Benefits:

- ◆ Thirteen (13) belt widths available for a variety of applications
- ◆ Speed range of 5 to 75 feet per minute (1.5 to 22.9 meters per minute)
Custom speed ranges available
- ◆ Increased load carrying capacity over a belt style conveyor
- ◆ Durable acetal chain provides long life, is completely self tracking, and is nearly silent running
- ◆ Two-piece drive and idler sprockets for ease of replacement without shaft removal
- ◆ Non-corroding stainless steel drive shaft and idler shaft
- ◆ Non-corroding stainless steel fasteners
- ◆ Nominal top of chain ranges from 22 inches (558.8mm) to 84 inches (2133mm)
- ◆ SpanLon wear strip and center support rail provide long-wearing, silent operation
- ◆ Conveyor lengths up to 104 feet (31.7 meters) available
- ◆ See individual models for minimum product size capability
- ◆ There are no "take ups" with Span Tech conveyors, as you have with belt conveyors. The overall length does not change.

Gearmotor

SEW Eurodrive S Series Helical Worm Drive, 230 or 460 volt (3 phase) operation

Conveyor Framing

Base material is steel, coated with blue epoxy powder coat paint for a long lasting finish

Ease of maintenance ...

Chain can be taken apart at any link

Conveyor Chain

White, acetal plastic with internal rollers for long life, ultra low starting inertia and virtually silent operation. Top surface is a smooth, tight lattice that pivots on stainless steel hinge rods

Bearings

Lubricated SpanLon bushings are internal to the conveyor frame

Foot Construction

Steel flange for easy anchoring

ST-PLN

ST-PLN Plain Chain

The Span Tech ST-PLN straight conveyor with smooth top chain is ideal for transporting packaged items, assembly work, or applications where belt conveyors have been traditionally used. The chain can support objects down to 1 inch (25.4mm) diameter if no transfer is used. With a gravity transfer, the smallest product is 4.5 inches (114.3mm). The transfer is set to a decline angle of approximately 6°. The tight knit of the chain surface provides a smooth base for large or small products.

Ideal for ...

Carton transporting

Light accumulation

Gravity transfers

ST-RAS

ST-RAS Raised Chain

The Span Tech ST-RAS raised chain straight conveyor with a Finger Transfer can transfer products as small as 1.5 inches (38.1mm) in diameter. The transfer is set to a decline angle of approximately 10°. Raised top chain can also be used to reduce the amount of contact between the chain and the product, increasing airflow.

Ideal for ...

Small products

Delicate products

Packaging

Finger transfers

ST-ROL

ST-ROL Roller Chain

The Span Tech ST-ROL straight conveyor with roller chain is essential for products requiring low back pressure for accumulation. Acetal rollers are set into the chain and turn freely on the stainless steel axle. This allows product to stay in place while the chain moves beneath it, nearly eliminating abrasion to the product.

Do not use this product where people's hands would be near the chain.

Ideal for ...

Increased accumulation

Carton transporting

Gravity transfers

Span Tech – Your Material Handling Specialist

Options

Fixed Offset Guide Rail

Inside face of guide rail matches with edge of conveyor chain. The guide rail material is ultra-high molecular weight polyethylene with a galvanized steel back channel for durability. The guide rail comes in both 1.25 inch (31.8mm) and 2.25 inch (57.2mm) widths.

Side Guarding

Optional side guarding is highly recommended when operators are required to work near or around the conveyors. The guarding design also provides a 7/8" (22.2mm) tall guide for product. The guard takes up 3/8" (9.5mm) of chain width per side. Made of mild steel and powder coated to match the conveyor.

Gravity Transfer

This option permits transfer onto and off of the ends of the conveyor. These units lift out and are held in place by gravity as a safety feature to prevent objects from becoming lodged between the conveyor chain and the transfer rollers. The transfer uses small acetal rollers mounted on 4mm stainless steel rods. The unit is pitch adjustable from level to -15° at the discharge end and from +15° to level on the load end. See Transfer Guidelines chart for application guidelines.

Movimot® Speed Controller

This is a frequency inverter built into the conduit box of the drive motor, with no external wiring other than your incoming power lines. Movimot® provides you with the lowest cost method of controlling the speed of your conveyor. The unit is capable of 200 to 500 volts AC and has a frequency range of 20 to 80 hertz. The unit features an integrated potentiometer for setting acceleration and deceleration times. It is IP65 hose proof/dust proof enclosed.

Slave Drive

The Span Tech Slave Drive unit is available for plain and raised style chains. This option allows two different conveyors to be driven by a single gear-motor. Consult a Span Tech representative for compatibility with your system.

Articulated Foot

Made of plastic with a steel reinforced core and non-slip pad attached to the underside of the foot, these feet provide a freestanding support for the conveyor frame. Foot option increases top of chain elevation 5" (127mm).

Caster

4" (100mm) diameter locking caster for mounting on the conveyor leg. As a safety limitation, not available on conveyors weighing more than 800 lbs. (364 kilos). Foot option increases top of chain elevation 5" (127mm). The maximum conveyor height is 47" (119.4cm) for casters.

Ceiling Support Bracket

Painted mild steel brackets bolt to the side of the conveyor frame and support your system on 5/8" (15mm) hanger rods.
