SPACERAK RACK PRODUCTS

SELECTIVE RACK

SpaceRAK provides Selective Storage Racks throughout many industrial and commercial environments. Selective Storage Racks are available with both the Roll Formed “Tear-Drop” Punching Pattern and Bolted Structural. The versatility and adaptability of these storage systems make them the mainstay of the storage rack industry.

DRIVE-IN / DRIVE-THRU RACK

Designed for High Density Storage utilizing the maximum warehouse storage cube while keeping aisle space to a minimum. Drive-In / Drive-Thru Racks can be designed using Roll Formed or Structural steel.

ENGINEERED SYSTEMS

Engineered Systems are designed specifically for a customer’s storage or distribution system. Multi-level pick modules, complete with catwalk service aisles and conveyor take-away aisles, can be fully fabricated by SpaceRAK in accordance with the appropriate set of specifications. At SpaceRAK, we understand that each system has its own unique storage parameters. We’ll provide the service you need to deliver an operating system that meets or exceeds all industry standards.

PALLET FLOW RACK

Pallet Flow Rack is designed for high density storage and provides "First In, First Out" or "FIFO" pallet storage. Pallet Flow Racks reduce the need for traffic aisles and improve warehouse utilization. SpaceRAK partners with Mallard Manufacturing, a leader in pallet flow systems, to provide turn-key solutions.

PUSH BACK RACK

Designed for High Density Storage by utilizing the warehouse cube, reducing required aisle space, and enhancing product selectivity. SpaceRAK designs Push Back Racks by utilizing cart assemblies from Advance Storage Products and integrating the carts with Roll Formed or Structural Steel rack components.

CANTILEVER RACK

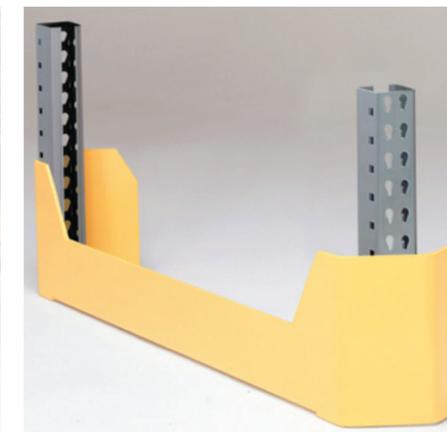

Cantilever racks are designed to service a broad range of storage requirements for products with varying weights, lengths, and sizes. With freedom from upright column interference, cantilever racks can accommodate most storage applications and allow for easier product removal and replacement.

SPACERAK SAF-T-PRODUCTS

Saf-T-Products is known throughout the industry for manufacturing high quality, in-plant safety equipment.
