

## Push and Hand-Geared Trolleys

- Capacities 1/4 - 25 tons
- Heavy rolled steel side frames extend beyond the wheels providing superior strength and added protection for trackwheels
- Thick section steel clevis suspended from steel equalizer pin. Alloy steel axles and equalizer pins are heat treated for maximum strength and wear life.
- Trolley wheels are fully machined from alloy cast iron and hardened for high strength and long service life. Units 1/4 through 16 tons employ universal wheel treads for use on flat or tapered beam flanges. 25 ton model operates on American Standard I-beams with tapered flanges. For patented track, consult factory.
- Lifetime lubricated, precision ball bearings standard on units through 3 ton capacity. 4 ton trolleys and greater feature eight, sealed Timken, tapered roller bearings and grease fittings.
- On hand-g geared models, a hand chain operated wheel turns a machined steel drive pinion, engaging the two geared wheels.

Note: Wheels with convex treads are standard on all capacities 1/4 - 20.

20, 25, 30 and 40 ton trolleys can be furnished in tandem construction - Dimensions for 30 thru 50 ton upon request.

Dimensions shown are for minimum beam size and will vary proportionately for larger beams.
