Features

- Completely automatic
- Squares loads up to 2500 lbs.
- Complete cycle in less than a minute
- Electro mechanical or hydraulic operation

LP-2000 Load Squaring System

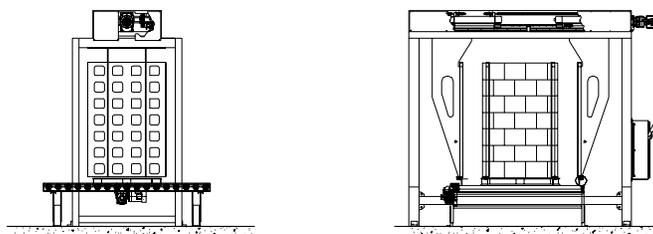

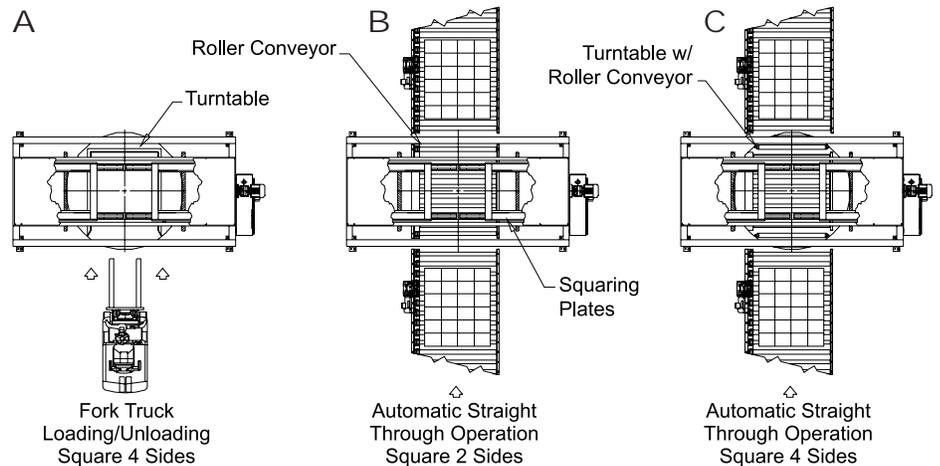

Description

The Newcastle LP-2000 is designed to square palletized cases prior to entering the automated storage retrieval system.

Operation

The product is loaded into the system with a fork truck or infeed conveyor. Next, two side squaring plates cycle in to square cases on the pallet. Then, the plates retract, the load is rotated and the squaring sequence is repeated. Finally, the product is removed with a fork truck or discharged to conveyor system.
