

Transfer Carts/Shuttles

This transfer cart provides a safe, easy and efficient way to shuttle the product from one end of the plant to the other. This particular transfer cart accepts pallets on product two at a time from the end of these conveyor lines. After the cart has been filled it then drives down the line and empties onto the packaging conveyors.

Key Features:

- Versatility
- Safe and efficient
- Fully Automated
- Equipped with a full line of safety lights and sensors
- Requires very little maintenance
- Large Capacity Range

This transfer cart is equipped with an Over/Under Conveyor system that feeds the bottom of each conveyor line with empty pallets while at the same time accepting the two full pallets on top.
