

796 MDZ

Motor Driven Zone Accumulator

— **35-120 FPM**

— **70 lbs. per Zone Capacity**

— **15"- 39" Conveying Surface**

— **Unidrive 24vdc Motor System**

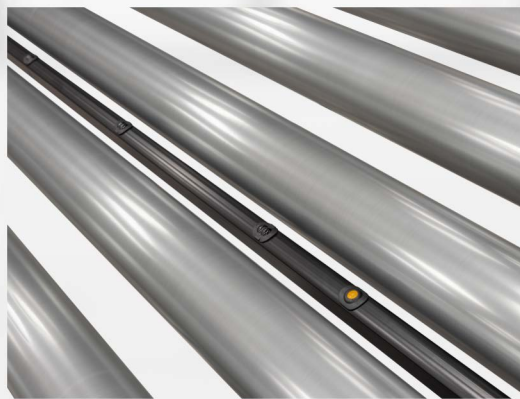

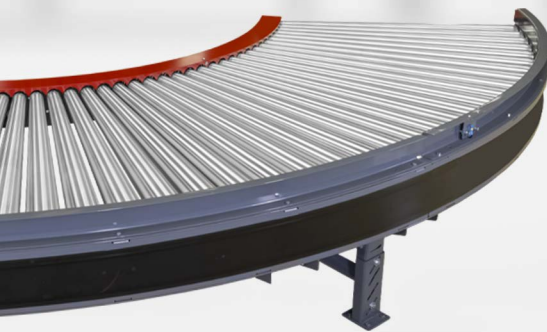

— **Precision ABEC Rollers**

— **Lightbar Zone Accumulation**

— **Low Decibel Motors**

The Motor Driven Zone Accumulator (MDZ) from Roach Conveyors is the most efficient and reliable transportation solution available for any industry application including parcel, e-commerce and retail, airports, warehouse and distribution centers, packaging, and more. The MDZ is band-driven by the low profile Unidrive motor system for high-speed precision and near silent operation.

The MDZ Accumulator is designed to enhance efficiency, reduce downtime, and improve overall material flow. Gain control of sorting, packaging, quality checks, and load balancing through each light bar monitored accumulation zone.
